Root	Existing responsibility boundary
packages/bijou/src/ports/surface.ts	Cell and layout contracts, packed-cell encoding, masks, transforms, and mutable packed-surface construction.
examples/docs/i18n-debt.ts	Debt contracts and baselines, TypeScript source discovery, raw-string classification, Markdown localization inventory, and ratchet evaluation.
packages/bijou-tui/src/app-frame-overlays.ts	Help, settings, shell-theme, notification-center, focus, scroll, layout, and drawer-rendering behavior.
packages/bijou/src/core/ui-scene-ir.ts	Scene and receipt contracts, canonical hashing, validation, semantic lowering, cell source maps, and terminal proof.
packages/bijou/src/core/render/differ.ts	ANSI parsing and serialization, layout painting, cell equality, string and packed diffing, byte encoding, and batching.
