Metric	Score (1-10)	Recommendation
Developer Experience (DX)	8	Best of: Design-system-first documentation and DOGFOOD as living proof surface — developers learn when to use a component, not just how.
Internal Quality (IQ)	5	Watch Out For: app-frame.ts at 2,679 lines with 9 responsibilities, 90+ internal functions, and a mega-closure that blocks unit testing.
Overall Recommendation	THUMBS DOWN	The external surface is strong, but the framed shell's internal structure is a maintenance time bomb. One more feature cycle without decomposition will make it unrefactorable.
